Real-time Project Management with Visual Intercept Project
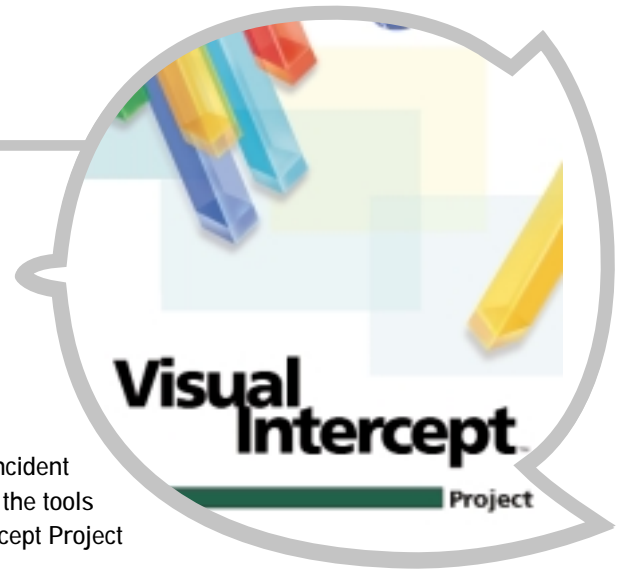

Overview

Manage. Organize. Communicate. Coordinate.
Visual Intercept Project is project management in real-time. Now, it's easy to effectively communicate with your team and control the process of complex project management. Visual Intercept Project integrates with Microsoft® Project to provide up-to-the-minute status regarding tasks across the enterprise.

Eliminate the need to schedule time-consuming meetings in order to be updated on individual tasks. Visual Intercept Project adds the power of incident management to project planning. When project changes occur, you have the tools to make smarter decisions about the impacting events. With Visual Intercept Project your team is aware of whatever occurs during the project life cycle.

Features and Benefits

Working in conjunction with Microsoft Project, Visual Intercept Project combines all aspects of project planning, development and maintenance in a single solution. Visual Intercept Project provides superior analytical tools that allow you to understand, assess and manage the impact incidents have on the plan, when producing a quality product or completing a project on schedule.

Manage.
Discover incidents that impact schedules and deadlines quickly with analytical tools, reports and graphs related to the Microsoft Project plan.

Organize.
Create a Microsoft Project plan from Visual Intercept incidents automatically.

Coordinate.
Transform your Microsoft Project plan into a fully integrated incident management system using Visual Intercept Project.

Communicate.
Identify, assign and update incidents related to Microsoft Project tasks and resources in real-time.

Visual Intercept Project Benefits:

- Enables teams to monitor and instantly adjust the plan according to unexpected events
- Allows teams to view real-time status of projects at multiple levels of detail
- Provides resource accountability
- Promotes on-time/on-budget results

Visual Intercept Project Features:

- Receive automatic e-mail notification when tasks are assigned or completed
- Access issues throughout your network or over the Web
- Assign and route tasks to the correct resources
- Keep history of all issues related to a task
- Import and export plans to and from Visual Intercept Project

ELSINORE
TECHNOLOGIES INC

Visual Intercept Project

Visual Intercept Project combines with Microsoft Project to provide a powerful real-time project management solution. Now you can have organizational control over all incidents affecting projects. Be in the know. With Visual Intercept Project you control how each change affects schedules, budgets and quality.

Projects demand detailed planning and monitoring. Now, project managers with Visual Intercept Project can evaluate options and validate decisions based on real-time data entered from anywhere and by anyone.
